Release Plan
Product: Amazon Discount Finder
Team: ADF
Date: October 10, 2017

High Level Goals

- Daemon that finds items discounted heavily (95-99% or user specified).

- Daemon notifies user of items found.

- Daemon automatically purchases items.

Sprint 1

- (3) As a developer, I want to learn and get used to the tools and systems and setup my environment

- (8) As a developer, I want to be able to access Amazons items

Sprint 2

- (8) As a user I want to see what items the script found in a text file.

Sprint 3

- (21) As a user I want the script to be able to purchase automatically.

Sprint 4

- (21) As a user I want an interface to search for an item or an item type.

Product backlog

- (3) As a user I want to be able to select the maximum/minimum price im willing to pay.

- (13) As a developer, I want to implement dependency injections and give the file daemon-like behavior

- (1) As a user, I want a well defined wiki to show me the prerequisites my machine needs in order to run this application

- (21) As a user I want to be confident that the items found are not aritfically discounted
